Subject: Village Hall Servers

In April 2011 the Village purchased server and storage hardware to host critical village applications. This equipment was purchased to meet the requirements of our New World System Logos (NWS) software along with other applications for five years. (Legistar document #110248)

In early 2015 a warranty extension was purchased extending the life of the server and storage hardware for an additional sixth year. These original servers will be six years old in May 2017 and are starting to show signs of age.

The plan for this project is to purchase three new Dell Servers and one new Dell SAN and configure them in a Microsoft Hyper-V Cluster with an attached storage area network to replace the existing hardware. The Tyler ERP (NWS), Exchange Email, Firehouse Web, Firehouse Data, and API Document Management software will be migrated to the new hardware. Replicas of all Police servers will also be migrated to the new hardware. The Village of Lombard has standardized on Dell server equipment.

Finance and IT requests Village Board approval to purchase new server hardware not to exceed \$60,000.
