Subject: Convert Yield signs to Stop Signs at Lombard Ave. and Hickory St.

The Village received a written request from Mr. Wayne Houston, 244 S. Lewis Ave. to install stop signs on Lombard at Hickory. Attached is an aerial of the intersection for your review. The aerial does not clearly show the bushes and trees on the southwest corner obstructing the driver's view of approaching vehicles. Based on my calculations the CAS (Critical Approach Speed) is 10 mph. When CAS are less than 10 mph a stop sign is warranted. Based on the above information I would recommend converting the yield signs to stop signs.
