PROPOSAL

Date: 5/10/2016 Updated 1/11/2017

Project Name: Village of Lombard
Broadway Stormwater Station

To: Luke Sharp

Energenecs would like to offer this proposal for SCADA services required for the new Broadway Stormwater Station with related Craig/Hickory site. Based on our meeting of August 31, 2015 and review of the recent drawings and specifications, we would like to offer the following:

Broadway Pump Station Site:

- Provide the PLC and HMI software for the SCADA panel which will be built by FLO-LO.
- Provide two configured Freewave FGR2-C Ethernet radios with lightning/surge arrestors to be installed and wired into FLO-LO's panel by them. I will assume that FLO-LO will provide a four port Ethernet switch as part of their panel with associated Ethernet cables.
- Provide and install two yagi directional antennas with coax cables to the outside of the building. One antenna will aim to the Craig/Hickory site and the other antenna will aim to the North Standpipe repeater.

Craig/Hickory Site:

- Provide the PLC software for the SCADA panel which will be built by FLO-LO.
- Provide one configured Freewave FGR2-C Ethernet radio with lightning/surge arrestors to be installed and wired into FLO-LO's panel by them.
- Provide and install one yagi directional antenna to the top of the pole with coax cable down to the panel. This will aim to the Broadway pump station site.

Charles Lane Pump Station

- We will send the data from Charles Lane station over to the HMI at Broadway and interlock the pumps at Broadway in the event that Charles Lane is at maximum capacity.

Other Work Included:

- We will add the software to the Master PLC and computer at Civic Center.
- We will pass data back through the SCADA radio network as recommended through the previous radio survey.
- I have included five (5) days of software startup services. Any time beyond that would be added on a T&M basis.
- Control software would be as determined by you in advance. I have not included additional time to re-configure the software to a different control scheme later

Cost to provide the work as described above would be **\$35,700.00**.

Terms:

- We request access to panels at Flo-Lo facility for programming and testing prior to delivery to site.
- Sales tax is not included
- Energenecs terms and conditions attached apply.

Please call if I you have any questions or other thoughts.

Sincerely,

Jared Feider
