Re: Wireless Alarm Monitoring System

Fire Department staff drafted and released a Request for Proposal to three qualified fire alarm vendors. We received written responses from two of the selected vendors and a verbal response from the third vendor. Their verbal response indicated no interest to bid on the project.

Reviews of the responses are as follows:

Chicago Metropolitan Fire Prevention:

The submitted bid package includes a significant statement indicating the immediate need to modify our fire alarm acceptance and enforcement procedures. This statement stems from specifics referenced in the National Fire Alarm Code. Bid package acceptance will be predicated upon considering the impact* of adhering to modification language in the proposal document on page six. Accepting the modification requirements will result in higher monthly monitoring fees to Village businesses that elect not to use the CFMP monitoring system.

* CMFP proposal on Page 6 reads; *Also, the village of Lombard and its fire code official will require Central Station Service for its subscribers who option to transmit their fire alarm signals to a Listed Central Station...*

The impact of mandating subscribers who option out of using the wireless network system to engage only Central Station Service for fire alarm monitoring, once they disconnect from the current legacy system, will manifest into higher monthly monitoring fees and the perception of placing limitations on private alarm monitoring company selections.

Tyco Integrated Security

The submitted bid package is without statements requiring any procedural modifications. The fire alarm monitoring service provided by Tyco currently meets all requirements specified in the National Fire Alarm Code.

Therefore, staff wants to pursue the Tyco proposal for the following reasons:

- They are a nationally recognized alarm monitoring service
- They are a significant operational partner for alarm equipment and service with DUCOMM
- They currently own and maintain all fire alarm equipment installed on Village property.
- Operational issues during any equipment transition will be seamless due to their position as equipment owners.
- Tyco has successfully installed and currently operates alarm monitoring radio networks in 50 Illinois municipalities and fire districts. In comparison, CMFP currently operates wireless networks in 16 locations.
