September 29, 2015

TO: Public Works Committee
FROM: Carl Goldsmith, Director of Public Works
SUBJECT: Project Site Visits/Review

As part of the staff's effort to keep the Committee informed on capital projects, a tour will be conducted at the October 13, 2015 meeting. The locations/projects that have been selected included the following:

1. Fairview Lift Station
2. Lombard Meadows Phase II
3. Vista Pond
4. Keith J. Surges Center
5. Terrace View Pond
6. Metra Underpass Project
7. Village Fuel Facility

These are a few of the larger projects that are being, or have been constructed over the last 12-18 months. A map of the route has been attached for your consideration.

As the tour is part of the formal agenda, we will need to return to the Village Hall to formally adjourn the meeting following the tour. I would be happy to discuss any other projects during the tour.
