SUBJECT: Text Amendments to Section 150.066 of the Village Code: Single Electrical Services

SUBMITTED BY: William J. Heniff, AICP, Director of Community Development *WJH*

BACKGROUND/POLICY IMPLICATIONS:

The Board of Building Appeals (BOBA), members considered the amendments to Section 150.066 as it pertained to Single Electrical Services. The amendments are intended to address safety concerns pertaining to principal and accessory structures, the proposed amendment would limit the number of electrical service lines for a single family, two-family or townhome lot be limited to a single service line. This limitation is justified in cases of power loss, emergency action or electrical work being performed on a structure. In such cases, an electrician or responder may shut off the power at a main connection. However, if a separate service feed is being provided on the given premises, this could increase the possibility of electric shock.

Please place this item on the December 15, 2022 Village Board agenda for consideration and approval, with a BOBA recommendation of approval of the proposed amendments.
