VII. Village Manager/Village Board/Village Clerk Comments

Village Clerk Liz Brezinski read the following announcements:
April is Distracted Driving Awareness Month across the nation. The Lombard Police Department is urging drivers to drop their phones and focus on the road to help make Lombard a safe community with a subtle reminder "Phone in one hand; Ticket in the other".

The Village's yard waste program begins this week and runs through the second full week in December. Stickers are required for yard waste bags, cans, and bundled brush and are available at various locations in Lombard and Villa Park. Residents may prefer to mulch grass clippings,

compost yard waste in a bin on their property or choose the annual curbside collection program. See villageoflombard.org/solidwaste for additional details.

There is a community shredding event scheduled for April 9th from 9:30 am until noon at the Lombard Village Hall complex. Limit of two banker boxes of documents per vehicle.

The Spring Blood Drive is scheduled Tuesday, April 19th from 8:00 am until 1:00 pm at Yorktown and from 1:30 pm until 7:00 pm at First Church, 220 S. Main Street. All donors will be entered into a drawing for a \$500 e-gift card for airbnb.com (air B&B). Be a hero - donate blood. Donating blood is safe, simple and saves lives. -

The Lombard Pride Clean up is scheduled Friday, April 22nd through Sunday, April 24th. Residents and businesses can participate to help clean up the bike trails and parks in town just before Lombard showcases its beauty during Lilac Time. See villageoflombard.org/496/Lombard-Pride-Cleanup

- The Plan Commission submits its recommendation to approve a request for a Minor Plat of Resubdivision with variations from the minimum lot width requirements of Section 155.407 (E) of the Lombard Zoning Ordinance within the R2 Single-Family Residence Zoning District. The proposed Minor Plat of Resubdivision would create two (2) buildable

lots where one (1) currently exists:

Lot 1, the northern lot, will have a lot width of 53.75 feet and will be 11,848 square feet in area and

Lot 2, the southern lot, will have a lot width of 53.33 feet and be 11,795 square feet in area. (DISTRICT #4)

Director of Community Development Bill Heniff provided an overview of a power point presentation.

Trustee Brian LaVaque asked for clarification related to the developer being required to tie into the existing storm sewer.

Director of Community Development Bill Heniff indicated he would be required to do so.

John Novak, owner of Fine Home Builders, spoke of his twenty years of building homes in the area and his proposed resubdivision of the property.

Jill Voss spoke relative to the proposed minor plat of resubdivision related to water/flooding concerns.

Trustee Andrew Honig read the following statement:

As the Trustee for District 4, I would like to take some time and explain my thought process in regards to the proposed two lot subdivision at 320 North Charlotte. Over the past month, I have had many residents from the 300 block of North Charlotte reach out to me in person, by phone and by email to share their thoughts on an almost daily basis. They are concerned about the potential impacts of building two houses on this lot and what it would do to the block. As an elected official, one of the most important things we have to do is to listen to those concerns and I wanted to educate myself on the issues. I have tried my best to do that in this case. In response, I do believe that there are some items worth noting that I wish to share with my colleagues on the Board and with the public before I cast my vote.

First, though there has not been a reported basement flooding incident in the area within the last ten years, residents have spent thousands of dollars mitigating water damage and water management with storm drains, and or projects to prevent their yards and back yards from flooding. Historically speaking, there has been standing water in almost every yard that is on Charlotte in some capacity and the concern lies with the fact that this water issue will always be an on-going issue within the district and for the residents. The residents were taken aback that the petitioner was able to put in his application that he would tie the sump pump from the proposed properties into the Village sewer line when they were under the impression that they were not allowed to do so themselves. In the end, I do believe the direct connection is a good mitigating strategy for the developer to limit the impact of water on the subject property. However, it does not account for the standing water of the existing sidewalks and yards nearby. Similarly, I do think that the Village can and should continue to talk to the existing residents regarding

the rear yard drainage program so they can avail themselves of similar solutions to address their historical flooding concerns. This should be the case regardless of the outcome of our vote on this petition. In addition, to the extent that the developer of the property at 320 North Charlotte has contractors that can be put in touch with neighboring residents to make their own private projects easier and more affordable to do, I strongly urge him to do so.

Since the year 2000, around 85 residents have used the rear yard drainage grant program. However, 35 percent of those 85 people have used this in 2018, 2019 and 2020 which is telling. This reflects an absolute need for the program as well as the fact that our weather patterns are changing as more intense rainfalls are occurring ever more frequently. In order for homes to qualify for this program there needs to be evidence of standing water for over 72 hours. Where possible, we also like to see that the impact extends over multiple residential properties. I believe that this area meets those criteria. Just last week I had taken a walk around Charlotte Street when we had a rainfall of approximately 1.3 inches. It was startling how much water there was built up on sidewalks and in yards and at the bottom of driveways including those adjacent to 320 North Charlotte. This water continued to stay there for the next 2-3 days making it difficult for pedestrians to walk the area and if another rain had occurred it would only have been worse.

Secondly, I would like to speak on the issue of Village code which says a lot in the R-2 zoning district must have a lot width of 60 feet. This is the variance that the Plan Commission has recommended approval for which we are discussing tonight. The resulting two (2) lots would be 53.75 feet and 53.33 feet wide respectively. I am concerned that if we have a 60-foot width code requirement is a variance warranted to subdivide this property and create two lots? If the existing property would not have permitted any development I might be more amenable to this approach. However, the existing lot is still buildable for one home. I do understand that a single lot would potentially result in one larger home that may take up the same construction space as two (2) smaller homes, but that single house would allow for greater separation from the neighboring structures. In summary, a rejection of the Plan Commission recommendation and a denial of the variance request would not result in an unbuildable property or hardship upon the contract purchaser.

In terms of the ultimate home or homes that are constructed, I do want to make it clear that my concerns in this area have no issue with the size, value or aesthetics of the new buildings. In addition, I do want to communicate to the public that what we are voting on tonight is not the final building to be built as that is a matter of permitting. What we are voting on is simply the separation of one lot into two lots.

Lastly, I do want to speak to an environmental issue regarding the potential loss of trees on this property. Some residents have vocalized

the concern for the trees coming down. To be fair, the existing property owner could remove those trees tomorrow if they wanted to do so as we do not have an ordinance that requires builders of mature lots to work around existing trees. However, going forward, I do want to do research on tree preservation policies that have been adopted by other communities and how those may assist us in keeping more mature trees as existing homes are torn down and replaced by new, larger ones. In closing, it is my position that denying this variance would not prohibit the contract purchaser from developing something on the property. However, approving this variance would supersede an existing ordinance and set up a scenario where further development could potentially ignore the concerns of an area with regard to flooding. This is not an argument on the character of the developer nor his past projects in the community. He builds great homes. I simply am choosing to look at an existing issue and support an option that in my opinion will have the least amount of impact going forward.

As I have heard a wise person say repeatedly, at the end of the day, we are all Lombardians living amongst each other and coexisting. I know this will be the case regardless of the vote tonight. Knowing this, I do wish to communicate to my colleagues, the developer and the residents, that I will be voting no on the petition before us this evening. Thank you. Trustee Bernie Dudek inquired about the Village Code as it pertains to driveways for new construction and the requirement of asphalt or concrete versus gravel driveways.

Director of Community Development Bill Heniff noted the driveways would need to be asphalt or concrete per Village Code, and that the water would be pitched toward the sidewalk and/or street.

Trustee Brian LaVaque felt the Village had done a great job over the years and especially the last several years relative to codes and disbursement of storm water, but felt the issue of standing water/drainage needed to be addressed.

A motion was made by Trustee Dan Militello, seconded by Trustee Anthony Puccio, that the Ordinance relative to PC 22-06: 320 N. Charlotte Street, minor plat of resubdivision with associated lot width variance, be passed on first reading. The motion carried by the following vote:
