Village of Lombard
225 East Wilson Avenue
Lombard, IL 60148

June 24, 2013

Thank you for partnering with FirstEnergy Solutions on the Village of Lombard Municipal Aggregation Program.

Through this offer, eligible residential and small commercial customers have elected our Green Energy product for their electric supply. Because this program is a 100% Green offer, FirstEnergy Solutions procures and retires an equivalent number of Renewable Energy Credits (RECs). In 2012, the Village of Lombard's Green Energy program usage totaled 33,189 megawatt hours (MWh), which were offset in the following proportions:

2012 MWh	Green-e Certified RECs ¹ Retired via Attestation	RECs Retired in PJM GATS ²	Total RECs Retired
33,189	33,189	0	33,189

Enclosed please find a certificate that acknowledges your community's participation in this program. Thank you once again for selecting FirstEnergy Solutions as your electric supplier. We value your business.

Sincerely,

Denise Berolatti
National Government Aggregation Representative
FirstEnergy Solutions

¹ Green-e Certified RECs (Product name FirstGreens[™]): FirstGreens by FirstEnergy Solutions is a Renewable Energy Certificate (REC) product from national wind sources that meet the Center for Resource Solutions strict source guidelines for a Green-e certified product. It constitutes independent, third-party verification of their renewable energy purchase, especially if pursuing certification for organizations such as LEED. The U.S. EPA's Green Power Partnership, U.S. Green Building Council's LEED standard, Cradle to Cradle Certification and others reference Green-e Energy in their renewable energy criteria.

² PJM GATS RECs (Product name: MixedGreens) by FirstEnergy Solutions is a Renewable Energy Certificate (REC) product customers may purchase from FirstEnergy Solutions REC inventory. MixedGreens RECs come from a variety of renewable energy sources.

Your participation
is a true
commitment to
environmental
stewardship
and will help
foster the
preservation of
