David A. Dratnol, P.E., Village Engineer

Date:

June 07, 2010

Subject:

Route 53 Water & Sewer Replacement Project

Design Engineering

Attached please find a contract, resolution and fee schedule for design engineering services for the Route 53 Water & Sewer Replacement Project.

This selection was made from the current Design Engineering Short List, which consists of five (5) firms. The proposal was sent to and proposals received from all five (5) firms. Upon review, it was determined that Baxter & Woodman of Itasca, is the most qualified firm to serve as design engineer for this project.

The project consists of replacing the water and sanitary sewer in the IL Rt. 53 Right-Of-Way between St. Charles Road and North Avenue, necessitated by the reconstruction of Route 53 by IDOT and because the water and sanitary sewer from the Great Western Trail to St. Charles Road are at their serviceable life. Project design will be performed in accordance with IDOT and Village Standards. The replacement of the water and sanitary sewer will be added to the reconstruction plans put together by IDOT's design engineer. The Reconstruction of Route 53 is currently slated for construction in 2013. IDOT wants the plans ready for construction in case funds become available at an earlier date.

The scope and fee were negotiated with Baxter & Woodman and agreed to by both parties. Design will include verifying existing utilities, close coordination with IDOT to ensure elimination of conflicts and integration of plans with the reconstruction plans, and procurement of all necessary permits for not-to-exceed design engineering fees in the amount of \$182,641.00. Funds will come from the Sewer & Water Capital Reserve Fund.

Please present this agreement and resolution to the President and Board of Trustees for their review at their regular meeting of June 17, 2010. If approved, please return two original signed copies to Public Works-Engineering for further processing.
